

T-D Interface Working Group

May 17, 2017 // 9:30am to 1:30pm

353 Frank H. Ogawa Plaza, Oakland, CA 94612

Call In: +1 (415) 906-0349 // Conference ID: 3847615

Agenda

1. Introductions and level-setting (15 minutes)
2. Presentation of Energise, an Advanced Microgrid Solutions project (45 minutes)
3. Presentation of Revised Use Cases and Related Real-time Coordination Procedures // 2017 Work Plan Action Items 3 and 4 (90 minutes)
 - a. Introduction to revised identified use cases
 - b. Feedback from working group
 - c. Identify Next Steps
4. Lunch Break (30 minutes)
5. Discussion of Draft Curtailment Principles (30 minutes)
6. Discuss future meeting dates, meeting agendas, and next steps (30 minutes)

2017 Work Plan action items within scope of the meeting include:

3. Develop example use-cases reflecting likely DER integration scenarios to ground discussion in practical implications. Consider how future pilot proposals may stem from identified use cases.

4. Specify potential real-time coordination procedures to manage potential conflicts between DO needs and ISO dispatches. Begin with scenario approach and then broaden as needed

5. Identify principles for a DO approach to DER curtailment resulting from distribution level constraints
