

## **Gridworks Resource Adequacy Convening Agenda**

December 15, 2020

2:00 pm – 4:00 pm (PT)

### **Meeting Agenda:**

#### **Introductions & Recap**

- Key Criteria of California's Future RA Program: What are the essential elements of a program that reflects anticipated changes in the energy supply, demand, and climate?
- How can these key criteria guide evaluation of interim proposals?
- Conclusions

#### **Questions to be discussed:**

- What are the key characteristics of California's future RA program, considering anticipated changes in the energy supply, demand, and climate? In particular, which of those characteristics are different from those of today's program?
- What evaluation criteria should be applied to determine whether interim RA improvement proposals contribute towards those key future program characteristics?
