Webinar ID: 890 6597 8342

**Topic:** Is more transmission needed in the West? What are the barriers to interregional transmission development?

**Objective:** The **Western States Transmission Initiative (WSTI)** is a collaboration of Western regulators and policy leaders working to improve approaches to transmission planning and cost allocation in the Western interconnection. WSTI is facilitated and led by Gridworks for the benefit of CREPC members. This informational webinar is intended to provide grounding information on transmission planning for CREPC members.

**Moderators:** Kate Griffith, Gridworks director  
Rich Glick, Gridworks senior fellow and former FERC commissioner

**Agenda:**

*10 - 10:10 a.m.* **Welcome and Introductions**

- Welcome from Gridworks and Rich Glick
- Overview of WSTI and today's webinar agenda

*10:10 - 10:30 a.m.* **Is more transmission needed in the West? If so, how much?**

- Presented by Rob Gramlich, Grid Strategies president

*10:30 - 10:50 a.m.* **What are the barriers to transmission development, both regional and interregional?**
