Topic: Transmission Cost Allocation

Objective: The **Western States Transmission Initiative (WSTI)** is a collaboration of Western regulators and policy leaders working to improve approaches to transmission planning and cost allocation in the Western interconnection. WSTI is facilitated and led by Gridworks for the benefit of CREPC members. This informational webinar is intended to provide grounding information on transmission cost allocation for CREPC members.

Moderators: Kate Griffith, Gridworks director
Rich Glick, Gridworks senior fellow and former FERC commissioner
