- Input and output files from SERVIM, access to virtual software?
- Provide the load profile data from PNM's EV charging program
- Energy and capacity projections, 2025-2046, stacked bar chart by components
- Share the work papers for the EE bundles
- Provide the probabilistic model for new loads

The screenshot shows the PNM website interface for the 2026 IRP Facilitated Stakeholder Process. The top navigation bar includes the PNM logo, a dropdown menu for "2026 IRP Facilitated Stakeholder Process", and links for "Documents" and "Reports". The main content area is divided into a left sidebar and a right main panel. The sidebar shows a tree view of folders: "2026 IRP Facilitated Stakeholder Process" (expanded), "1 - Public Modeling data" (selected), "1.1 - Generic Resources", and "1.2 - Energy Efficiency and Demand Response". The main panel displays a list of files under the breadcrumb "2026 IRP Facilitated Stakeholder Process > 1 - Public Modeling data". The list has columns for Index, Type, and Name. Each item includes a star icon for marking as a favorite.

- Requests for clarification by topic, first by the person who submitted questions in this topic, then by others

TOPICS

1. Modeling Framework
2. Transmission Modeling
3. Loads and Resources
4. Demand and Energy Landscape
5. Energy Efficiency and Demand Response Programs

In response to participant feedback:

- More structure for Q&As with clear deadlines
- Both written and more dialogue in March and April
- Please bring new questions to Workshop #4 on March 11
- Questions for consideration:
 - What is at the core of stakeholders' modeling run interests?
 - What runs will result in new insights to inform the statement of need?
