Please see 2 additional comments of Staff that were inadvertently omitted from our earlier comments.

7. Add to the beginning of the SON a statement that reflects the Need. Such as: "SPS's 2026 IRP presents a comprehensive and forward-looking strategy to reliably and efficiently serve projected customer demand while achieving compliance with New Mexico's clean energy requirements through 2045."6

8. requested revision to the Action Plan, add to section C.v.1.a. language from paragraph 4 of the PNM action plan regarding LLTP

SPS will form a working group to evaluate strategic public and private partnerships, policies and funding mechanisms or tax credits, including new state and federal incentives, to support the deployment of emerging [or existing large capital] clean energy resource development [] with the goal of benefiting customers by reducing development risk and managing associated costs. A focus of the working group will include identifying potential solutions to challenges of seeking emerging and long-lead technologies under the current RFP process outlined in the IRP rule.

Thank you.

Sincerely,

Judith Amer
